HAYES NEW 65 DAY ROASTING-EAR CORN

NEW 65 DAY CORN

Indispensable on the farm for early feeding as well as table use. Under favorable weather, yields 100 bushels to the acre.

Our 65 day Roasting ear corn. was introduced by us more than 25 years ago. It matures ears 10 to 12 inches long. While it is not a true Sweet Corn. you can hardly tell the difference. It makes a wonderful feed due to its earliness.

PER LB. **25c** — **2** LBS. **45c**

SWEET CORNS

OPEN POLLINATED SWEET CORNS

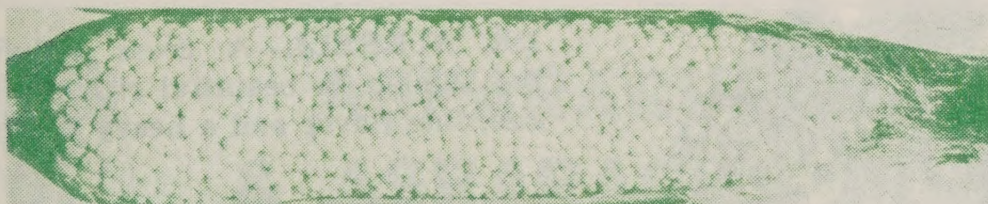

STOWELL'S EVERGREEN. (91 days.) An improved strain. It's fine for roasting ears, for drying, and for canning and it has the largest ear, deepest kernel. The corn remains long in the milk before ripening up which lengthens its season for your table use.

Big 3-oz. Pkt. 10c; 1/2 lb. 22c; lb. 35c; 2 lbs. 60c, Postpaid

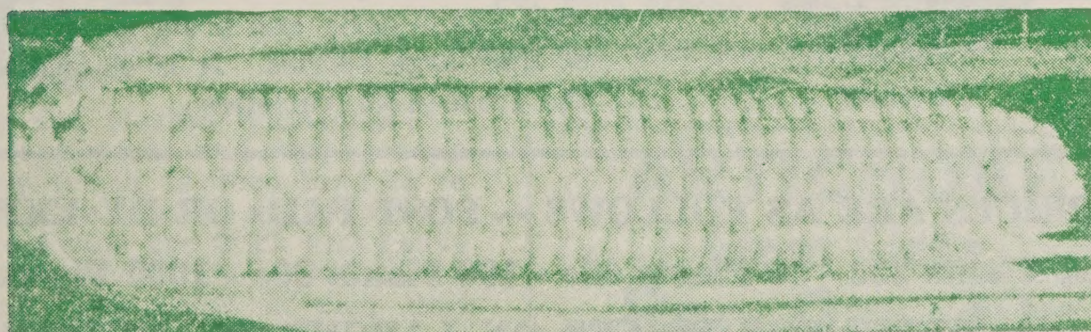

GOLDEN BANTAM. (77 days.) Everybody likes Golden Bantam. Many people won't plant anything else. The flavor is delicious, sugar content high. Kernels are tender. Very wide and deep, cob small. **Big 3-oz. Pkt. 10c; 1/2 lb. 22c; lb. 35c; 2 lbs. 58c, Postpaid.**

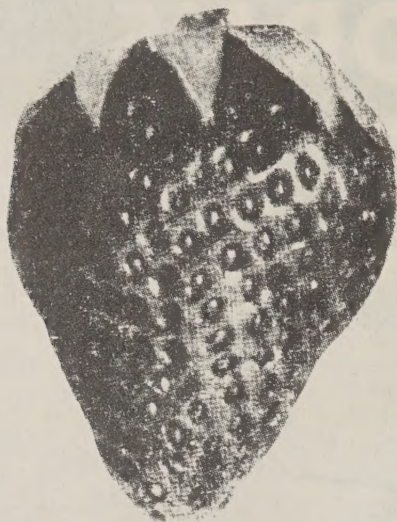

COUNTRY GENTLEMAN. (Shoe Peg.) (93 days.) Long, narrow, pointed kernels and irregular on the cob. It's a dandy! From 2 to 3 large ears on a stalk. Packed with long, white kernels. Sweet, tender and fine flavored.

Big 3-oz. Pkt. 10c; 1/2 lb. 22c; lb. 38c; 2 lbs. 65c, Postpaid

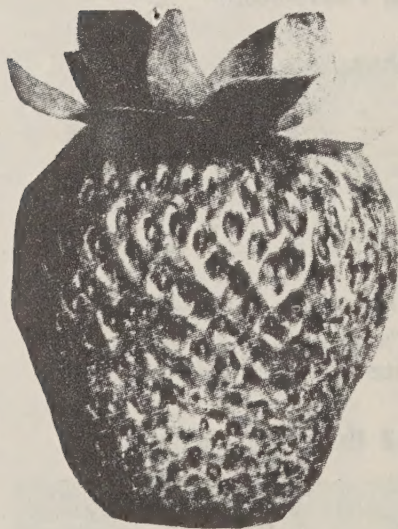

Golden Bantam Evergreen Large Ears

MISSIONARY

BLAKEMORE

DUNLAP

**WE OFFER YOU
STATE INSPECTED**

STRAWBERRY PLANTS

Our plants are grown in Michigan, Wisconsin, Tennessee, Arkansas, Missouri and Kansas.

DUNLAP—One of the grandest berries grown. Does well in most locations. A fine table berry good shipper and a heavy cropper.

BLAKEMORE—This is an early berry and was developed by the United States Department of Agriculture. It resembles the Missionary in plant growth, foliage upright glossy, berries large, dark red, fine flavor and good producer.

AROMA—A popular late variety, foliage deep green, berries a bright red and have a wonderful flavor.

DR. BURRELL—A cross of the Crescent and the Dunlap. A beautiful rich red color, large size, fine flavor and a heavy bearer.

MISSIONARY—This berry is a favorite in the south where large acreage is planted for shipping early berries to northern markets. It is very desirable for home use.

PREMIER—By all means give this berry a trial. It is early and produces an abundance of fine large berries. It is classed as one of the frost-proof varieties.

Price: Any Variety, Postpaid:

DAVIS PERFECT

68 days. Splendid dark green slicing variety particularly valuable for shipping. Fruits very dark green; retain color long after picking.

EARLY FORTUNE

66 days. One of the most desirable slicing sorts; extensively grown for shipping. Fruits very dark green.

CHICAGO PICKLING — (Westerfield)

60 days. Valuable pickling and slicing variety.

EARLY WHITE SPINE

60 days. The most popular white spined cucumber for the home garden.

EVERGREEN WHITE SPINE

(Arlington)—66 days. Splendid for home garden, market garden and shipping.

IMPROVED LONG GREEN

The most popular and one of the best for the home garden; particularly desirable for slicing.

KLONDIKE

Very desirable for shipping. Fruits handsome; very dark green; white spined; 7 to 8 inches long.

EARLY CLUSTER

56 days. Very fine for early slicers.

EARLY SHORT GREEN OR EARLY FRAME—56 days. Splendid for pickling or slicing.

BOSTON PICKLING

60 days. Splendid pickling and slicing sort. Fruits medium dark green.

A. & C.

Leading variety for market gardeners. 10 inches long.

STRAIGHT 8

For home use, and retail sales by stores and markets. None better.

SMALL GHERKIN

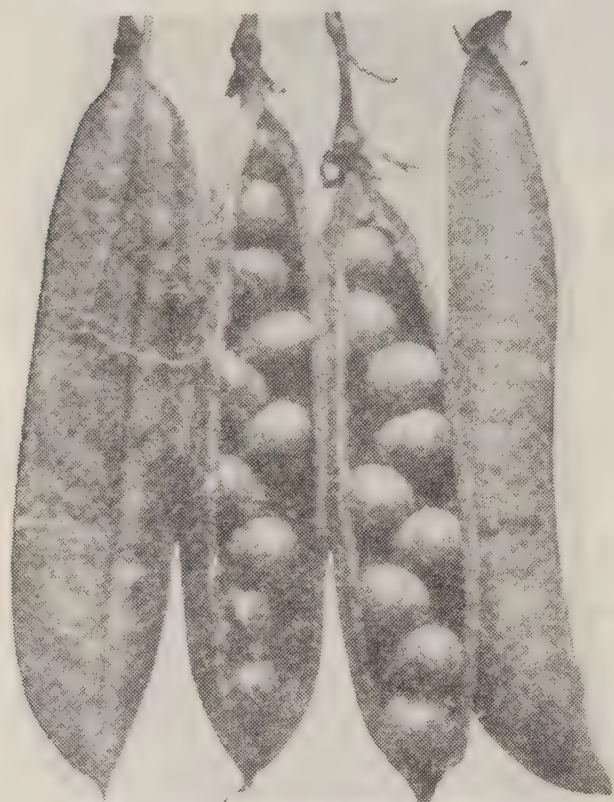

A superior quality for pickles. A true West India gherkin, and not a true cucumber. Very prolific, matures for pickles in about 60 days, pale green, prickly over entire surface, become ½ to 2 in. long, oval, very uniform, seeds numerous.

BLACK DIAMOND

Splendid for shipping. Fruits rich dark green retaining their color long after picking. 10 inches long.

GARDEN PEAS

PEAS OF MANY VARIETIES

Pkt.— $\frac{1}{2}$ Lb. 20c

Lb.—35c

Postpaid

In Large Quantities at much less price

MORSE EARLY about 70 days, bearing large pods and out-yielding many of the other varieties.

GIANT STRIDE, another large pod variety.

LITTLE MARVEL—Fast becoming the most popular of dwarf sorts for the home garden.

FIRST AND BEST—An extra early smooth variety of fair quality; 6 to 8 peas in a pod.

ALASKA—One of the very earliest blue peas; quite productive, often called Early June.

LITTLE GEM—McLean's very desirable early pea, heavy yielder of good quality.

LAXTONIAN—One of the best dwarf wrinkled peas for the market gardener. Pods about 4 inches long, resembling those of Gradus, but ripening a little earlier.

CREOLE—Long bearing and vining variety, very prolific.

AMERICAN WONDER—Nearly as early as Alaska, a good yielder, quality of the best.

GRADUS—One of the Largest Early Varieties. Height 18 inches.

THOS. LAXTON—Height 30 inches. The only rival to the famous Gradus, as a long-podded extreme early wrinkled pea.

NOTT'S EXCELSIOR—Height 20 in. The finest Dwarf Wrinkler Extra Early Variety—it is the best of recent introductions.

POTLATCH OR IMPROVED STRATGEM—A large podded wrinkled pea of fine quality. Vigorous and productive vines about 30 inches high. Six to seven peas to pod.

EVERBEARING—Long pods and large peas; sow thin. Height, $2\frac{1}{2}$ feet.

TELEPHONE—Very valuable, vigorous grower, pods large, sweet. Height 4 ft.

CHAMPION OF ENGLAND—Tall, strong vine, round blunt, dark green pods, very rich, fine flavor.

LARGE WHITE NARROWFAT—Late very tall, dark green vine, medium large round pod; white smooth peas. Good producer.

TALL MELTING SUGAR EDIBLE

PODS—A true sugar pea, large, broad, stringless pods; vines medium tall.

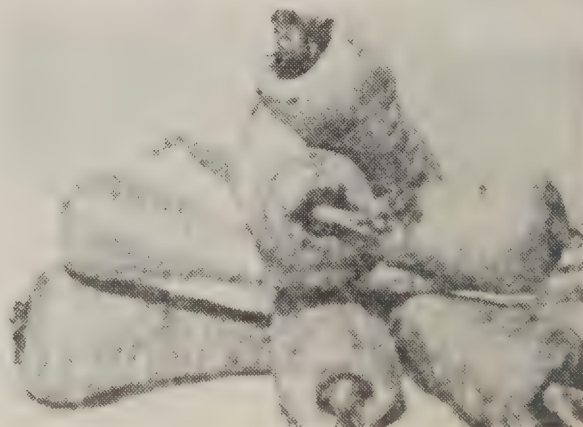

PARSNIPS

HOLLOW CROWN—The most popular variety. The roots which are creamy white are smooth, tender and of excellent flavor.

LETTUCE

GRAND RAPIDS

As a forcing and shipping lettuce this undoubtedly stands at the head; beautiful in appearance.

HANSON IMPROVED

Always sure to make large, handsome heads of excellent quality; outer leaves green with light veins, inner leaves white.

BIG BOSTON

Desirable either for forcing in cold frames or open ground planting; always produces large, solid salable heads.

DENVER MARKET

Early, for forcing or open ground; heads large and solid; leaves crisp and tender, blistered like a Savoy Cabbage; most attractive in appearance.

SIMPSON BLACK SEEDED

Nearly double the size of Early Cured Simpson; leaves delicate golden yellow; for forcing or out of doors.

SIMPSON EARLY CURLED

White Seed.

ICEBERG

New. Of beautiful appearance and excellent quality; leaves green; slightly tinged with red at the edge; heads good size.

MAY KING

New. Heads extra large clear yellow; very desirable.

PARIS WHITE COS

The Cos or Celery Lettuce is a very distinct type, having a tall, elongated head.

SEED CORN

(Certified by Kansas Crop Improvement Association)

— K-2234 WHITE —

Is a late maturing White Hybrid producing high consistent yields under conditions varying from drouth and heat to the most favorable. It produces heavy, thick ears and a wide kernel, ideal for milling. Under practically every condition it stands well and holds ears on stock. Our supply of K-2234 is limited.

— U. S. 13 —

Yellow. Maturity about 120 days. Originally developed by the U. S. Department of Agriculture. Our corn was grown here in Kansas, and inspected, certified and sealed by the State Board of Agriculture. There is none better. It develops large ears, not flinty. Similar to Reid's Yellow Dent.

— K-1583 & 1585 —

Yellow—100 Days. In appearance it resembles the Kansas Sunflower variety. Grains are large and deep. A fine feeding corn. Give it a trial.

We have other hybrids. Let us know what you want. We mail Samples Free.

We want to book your order NOW! We will ship it when you are ready for it. You can pay for it when delivered. We will send you samples of any variety of corn you want.

Small Sugar or New England Pie

This is the small sweet pumpkin that has made New England famous for her pumpkin pies. The flesh is very fine grained, most deliciously sweet and fine flavored, a splendid keeper. The fruits are deep orange, 8 to 10 inches in diameter, somewhat flattened and slightly ribbed. Flesh fine grained, deep orange yellow color.

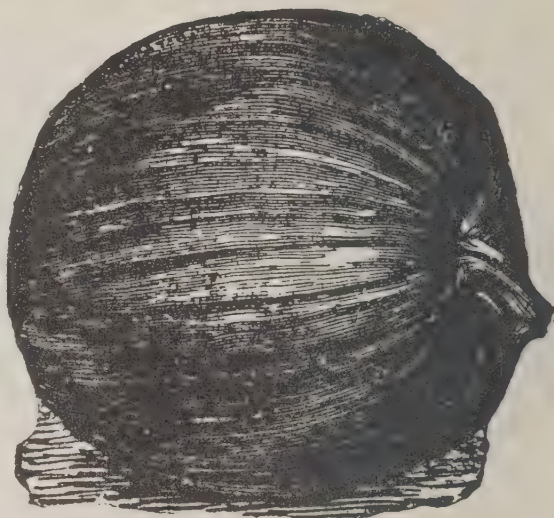

King of Mammoth

This is the largest pumpkin, often growing to weigh 75 to 100 pounds. The quality is excellent, makes very fine pies. Yields a heavy tonnage per acre,

LARGE SWEET CHEESE

¼ lb., 39c; ½ lb., 69c; lb., \$1.25, postpaid.

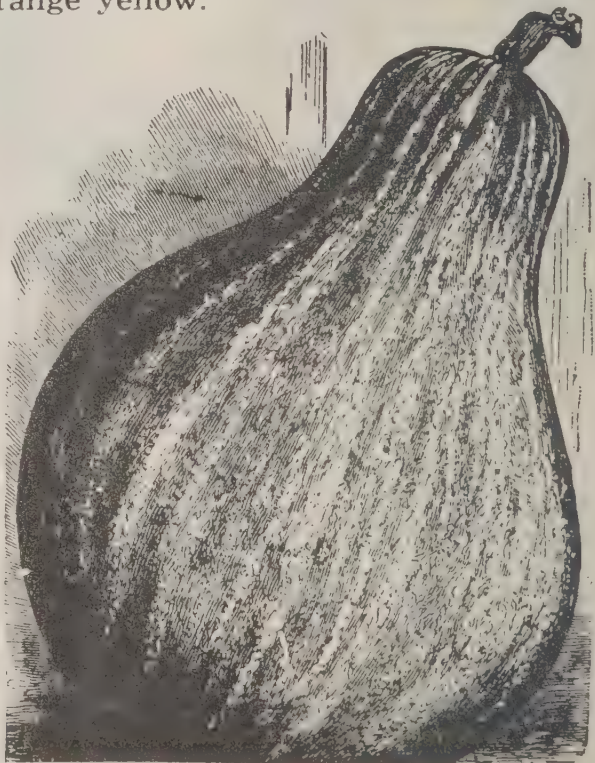

THANKSGIVING PIE PUMPKINS

The finest and sweetest of all the pumpkins. I have been offering this variety for several years and have not found one to equal it.

Connecticut Field

Fruits rather long, flattened at the ends, 12 to 15 inches in diameter, skin, ribbed, smooth, hard reddish orange. Flesh rich orange yellow.

Tennessee Sweet Potatoes

Fine for baking or pies.

Large Cheese

A Flat variety—Golden yellow

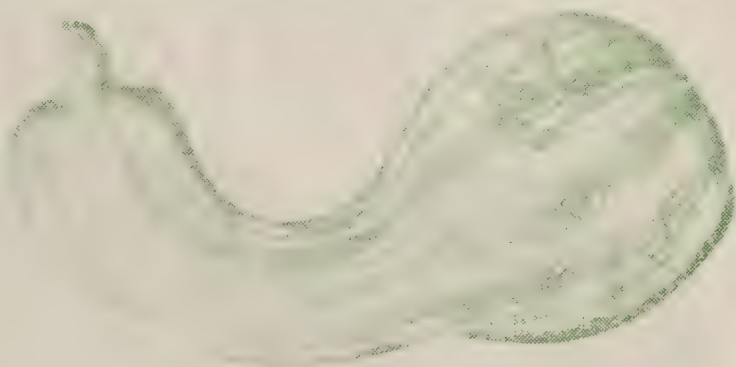

Per Oz. 10c; ¼ Lb. 20c; Lb. 80c

CASHAW—Color light green with darker green stripes. Large solid neck, flesh light yellow, well known and a favorite sort.

CASHAW—White crookneck. The same as above only White.

JAPANESE PIE—Dark slate colored with slightly lighter green mottled stripes. Neck large and solid. Meat deep orange red, quality excellent. A heavy yielder. Good keeper and excellent either for pies or baked.

Cashaw - 5c pkt. - 10c oz. - 1 lb. \$1

PEPPERS

Ruby King

Fruits about the same size as Ruby Giant, but more tapering. Plants early, productive.

Pkt. 5c—Oz. 30c— $\frac{1}{4}$ Lb. \$1.00

Long Red Cayenne

(Hot.) 70 days. A leading sort for use in pickles, for canning and for drying. Plants large, very prolific.

Pkt. 5c—Oz. 30c— $\frac{1}{4}$ Lb. \$1.00

Pimento

(Sweet. The same as Perfection.) 72 days. Standard variety for home and market garden, grown on large scale for canning whole. Plants large, upright, heavily productive. Fruits very smooth, regular heartshaped, commonly about 3 in. long (easily cored for canning); deep

green, becoming deep red; flesh very thick, sweet and of splendid flavor.

Oz. 30c— $\frac{1}{4}$ Lb. \$1.00

Harris Early Giant

Earliest and most prolific of the large peppers. Plant of compact growth often yielding twelve to fourteen large, pendant fruits on a single plant. Mild, sweet, scarlet when ripe. Valued as an early green pepper by the market grower and excellent for the home garden.

Pkt. 5c—Oz. 30c— $\frac{1}{4}$ Lb. \$1.00

Chinese Giant

One of the largest of the mild, red varieties. plant of short stocky growth, light green foliage. fruits pendant, thick, blocky and square ended, 4 to 5 inches in diameter and equal length. Color, a brilliant, glossy scarlet.

Pkt. 5c—Oz. 50c— $\frac{1}{4}$ Lb. \$1.50

World Beater

A very large, thick walled pepper of excellent quality and a fine shipper. A cross between Chinese Giant and Ruby King. Often grows to four inches in diameter and 5 to 6 inches long. A favorite with Southern planters. Flesh thick and mild. Very productive.

Oz. 35c — $\frac{1}{4}$ Lb. \$1.00

Anaheim

Particularly adapted to culture in the South. Is grown on a commercial scale for drying and canning. Fruits late, 6-8 in. long, about 1 inch diameter and tapered. Deep green becoming rich scarlet when matured. Mildly pungent.

Pkt. 5c—Oz. 30c— $\frac{1}{4}$ Lb. \$1.00

PLANT POP CORN FOR PROFIT!

HYBRID Varieties are most in demand, and

I would advise you to plant this Variety.

CANTELOPES

HALE'S BEST—An early melon, ripening in 75 to 80 days. Normally 6 to 6½ inches long, densely covered with medium heavy netting and almost devoid of ribbing.

EXTRA EARLY HACKENSACK—Ripens ten days earlier than the Hackensack.

BURRELS GEM—Dark green with thin skin, flesh thick, salmon colored, very delicious.

POLLOCK NO. 10-25 — Salmon tint flesh, good shipper and early.

BANANA—A long salmon fleshed variety of good flavor, growing about fifteen inches long.

EMERALD GEM—Small, extra early; smooth ribbed, dark green skin and orange flesh; quality first rate, very sweet.

GOLDEN NETTED GEM—Very early; is small and of fine flavor; green flesh.

LATE HACKENSACK — Large round, and of good quality; a popular variety.

HALE'S BEST—No. 36. An outstanding shipping and market variety.

HALE'S BEST—396. Produces melons 5 to 6 lbs., ready in about 80 days.

HALES JUMBO—85 days, flesh is deep salmon color. Melons will net, 5 or 6 lbs.

Hearts of Gold

This popular medium sized melon follows the earlier varieties. It is fine to plant for succession as it ripens in about 100 days.

Honey Ball

105 days. Splendid for home, market garden, and shipping. Very productive. The fruit globular; 5 in. in diameter; yellowish white; smooth; sparsely netted. Flesh silvery green; juicy with sweet, honey-like flavor

Tip Top

Melons are round in form, well ribbed; light green skin; flesh is thick, bright salmon in color, of luscious melting character; firm for shipping purposes.

CASABA — Golden Beauty.

BENDER'S SURPRISE—Fine large oval melon, wt. 7 lbs.

HONEY BALL—3½ lbs., flesh gray green, very sweet.

HONEY DEW — Creamy White, green flesh, 6 lbs.

OSAGE—Cocoanut shaped, yellow flesh, light green, netted skin; good quality, intermediate.

HONEY DEW—Round, smooth skinned flesh, light emerald green. Very sweet sugary flavor. Good keeper.

ROCKY FORD—This is the most popular of the basket melons; oval, light ribbed, densely covered with coarse green netting, flesh thick, green and sweet, highly flavored.

GREEN NUTMEG—Named from its shape, green flesh, good for main crop.

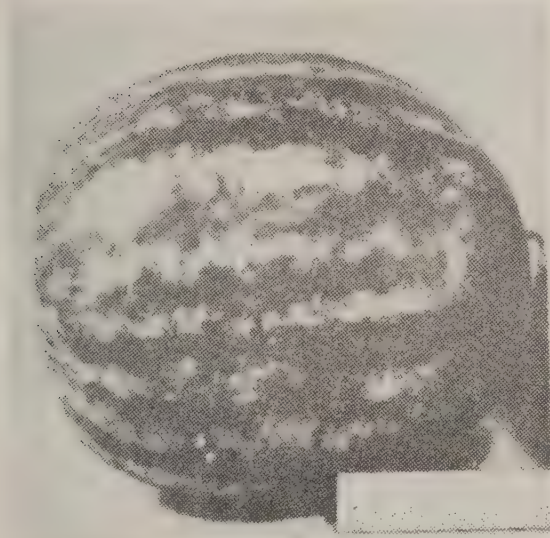

PAUL ROSE—Unsurpassed in quality, unexcelled for shipping, flesh firm, rich orange color, covered with dense netting not ribbed.

Maryland or Knight—Montreal Market
Montreal Market

HAYES EARLY KANSAS WATERMELON

The World's Earliest And Largest Melon Grown!

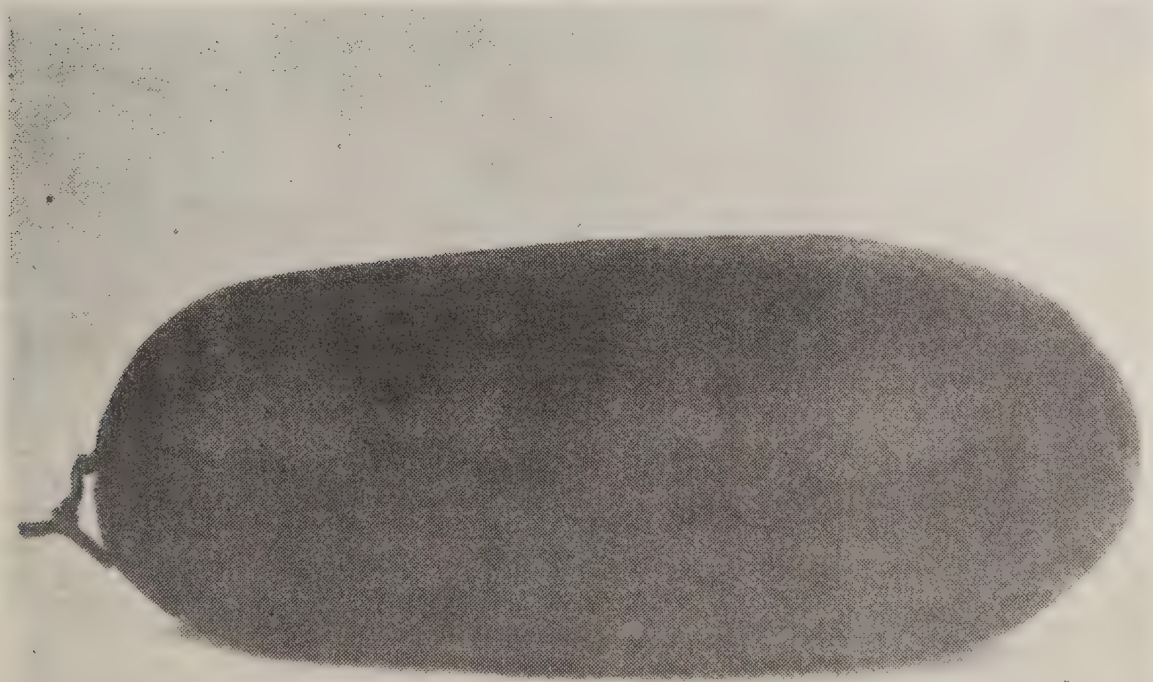

Introduced by Hayes Seed-house in 1934, this Melon has become one of the Greatest of all Melons. Matures ahead of any other Melon, and ready for market in 80 days. The Melon in the picture weighs 54 lbs. Seed this season is limited.

Price—Per Oz. 15 cts:

Per Lb. \$1.25

LEESBURG (Wilt Resistant)—Weight 35 pounds. Edible in 85 days. A wilt resistant variety developed from Kleckley Sweet by the Florida Department of Agriculture. It makes a vigorous vine which assures productiveness and because of the heavy rooting, vines hold up under adverse weather conditions. The rind is thin, hard and tough. Color dark glossy green. Flesh deep-red and sweet. Seed white.

CONGO 46-40 . . A NEW ANTHRACNOSE RESISTANT WATERMELON VARIETY

CONGO (U.S.D.A. 46-40)

Anthracnose resistant (90 days). This outstanding new disease resistant variety was developed and recently introduced by the U.S.D.A. Southeastern Vegetable Breeding Laboratory, Charleston, S. C. It is the only shipping variety known today which is resistant to anthracnose disease, although it is not immune to this disease and should be given protection like other varieties. It promises to be of exceptional importance not only because of its anthracnose resistance, but also because of its exceedingly hard, tough rind which resists breakage and bruising in transit. For this reason railroad men and buyers are very much interested in it. In addition to these two good qualities, it possesses many other desirable features. It is an enormous yielder of large size melons, under good growing conditions ranging from 32 to 60 pounds. Similar in size and shape to Garrison but having a darker green rind with darker green stripes. It does not produce gourd necks. Flesh of attractive bright red color, of excellent quality and flavor, ripening well out to the rind, with very small white seed and very attractive interior appearance. This is the most promising new variety of watermelon for shipment yet introduced, and it has a big future. A few cars shipped out of Florida last season topped the market. Seed supply extremely limited.

PRICE PER OZ. 35c — PER LB. \$5.00

STRIPED KLONDIKE,

A wilt resistant selection by the University of California for home garden and local market use.

Fruits : Medium sized, thick, cylindrical.

Rind : Moderately tough. Color like GEORGIA RATTLESNAKE.

Flesh : Very dark red, fine quality, crisp and sweet.

Seeds : Small, mixed black and white.

OZ. 15c LB. 1.25

CLETEX (SPOTTED WATSON)

Of the WATSON type but with tougher rind; a good distant shipper. Does not readily sunburn.

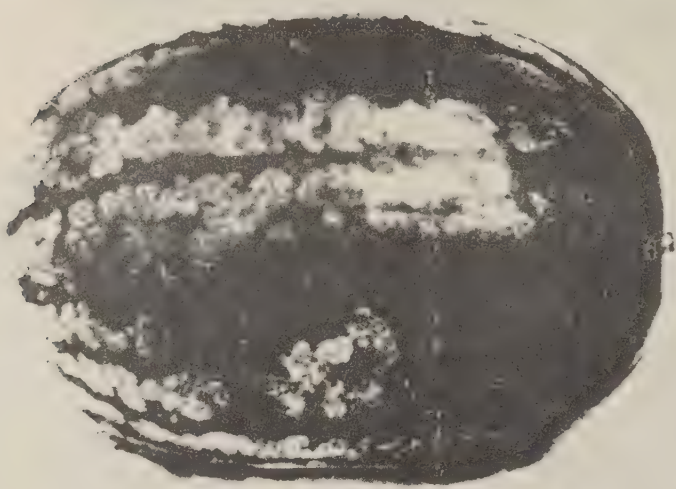

Fruits : Large and cylindrical.

Rind : Tough dark green mottled and lighter green background.

Flesh : Deep bright red, sweet and firm.

Seed : Brown.

OZ. 15c LB. 1.25

GEORGIA SWEETHEART

A home garden type.

Fruits: Medium sized, round to blocky ended, oval. Remain edible for a long time.

Rind: Tough, elastic, light green with fine dark green veining.

Flesh: Bright red, crisp, fair quality.

Seeds: Medium sized, black.

OZ. 15c

LB. \$1.25

GRAYSTONE

For home gardens or nearby markets only. Easily bruised so must be handled carefully. Awarded the All-America Silver Medal for 1933.

Fruits: STONE MOUNTAIN Type, very large, oval round.

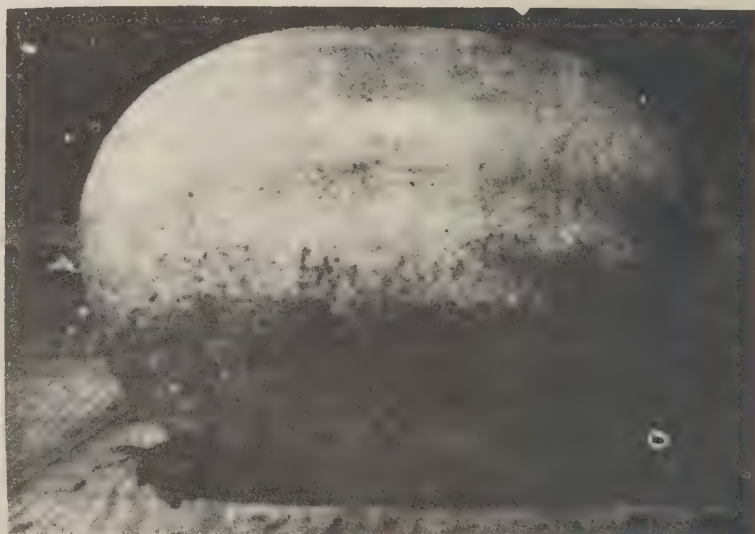

Rind: Thin, tender, mottled gray green.

Flesh: Bright red, exceptionally sweet, fine textured, crisp.

Seeds: Medium sized, white.

OZ. 15c

LB. \$1.25

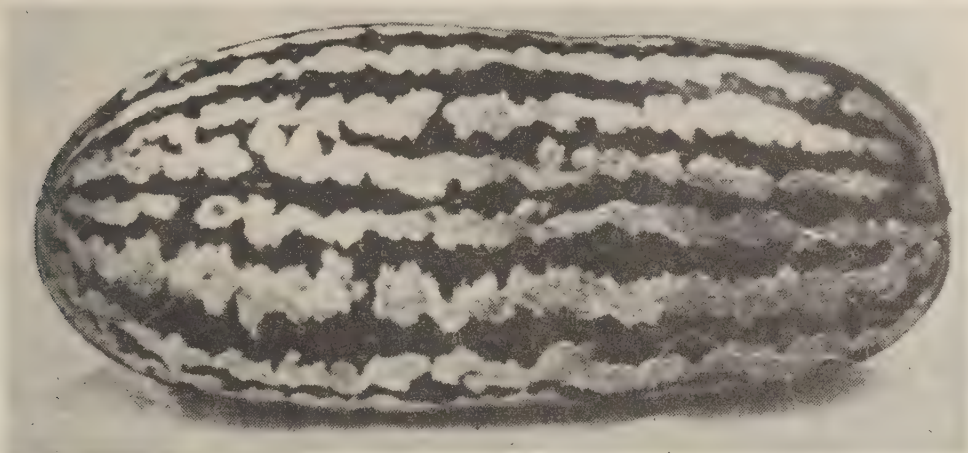

DIXIE QUEEN WILT RESISTANT

An improved Dixie Queen, resistant to Fusarium Wilt. Fruits are more uniform in size, cut redder and ship better than the standard strain of DIXIE QUEEN. Seeds are about 50% larger in size. A very fine watermelon for shipping.

OZ. 15c

LB. \$1.25

DUDE CREEK

Popular for shipping and home garden in the South.

Fruits: Large long, cylindrical, blunt ended.

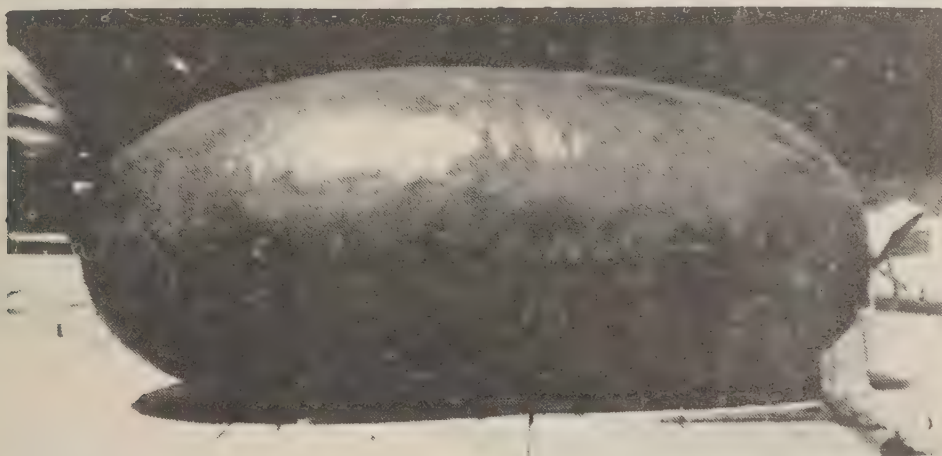

Rind: Hard, thin, white with dark green irregular stripes.

Flesh: Bright red, fine texture, solid sweet, very flavorsome.

Seed: Medium large, white with a touch of brown on the sides.

OZ. 15c

LB. \$1.25

BLUE WATSON

A distinct variety of TOM WATSON. The rind is dark blue green, sometimes nearly black. It is more prolific than WATSON and has very red flesh.

OZ. 15c

LB. \$1.25

BLACKLEE

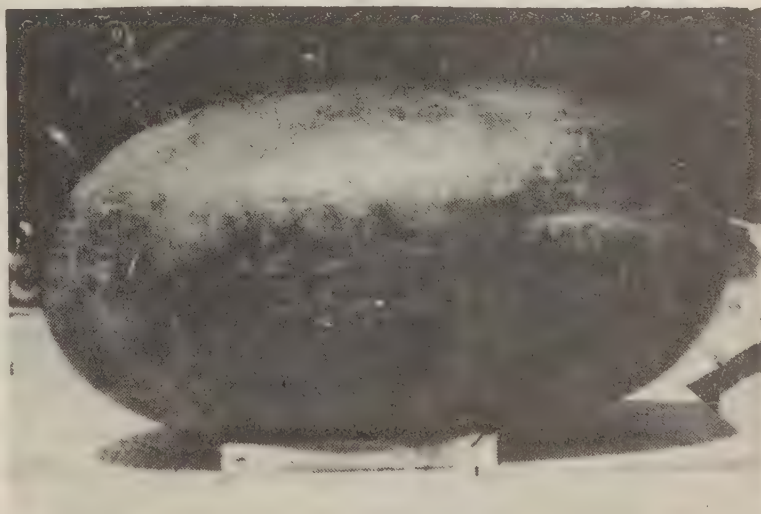

Very resistant to Fusarium wilt. A good shipper and keeper, outstanding for local trucking.

Fruits: Medium large, blocky, cylindrical.

Rind: Dark blue green, thin, tough.

Flesh: Deep red, firm, fine grained, tender and very sweet.

Seed: Medium sized, black.

OZ. 15c

LB. \$1.25

— Watermelon Seed —

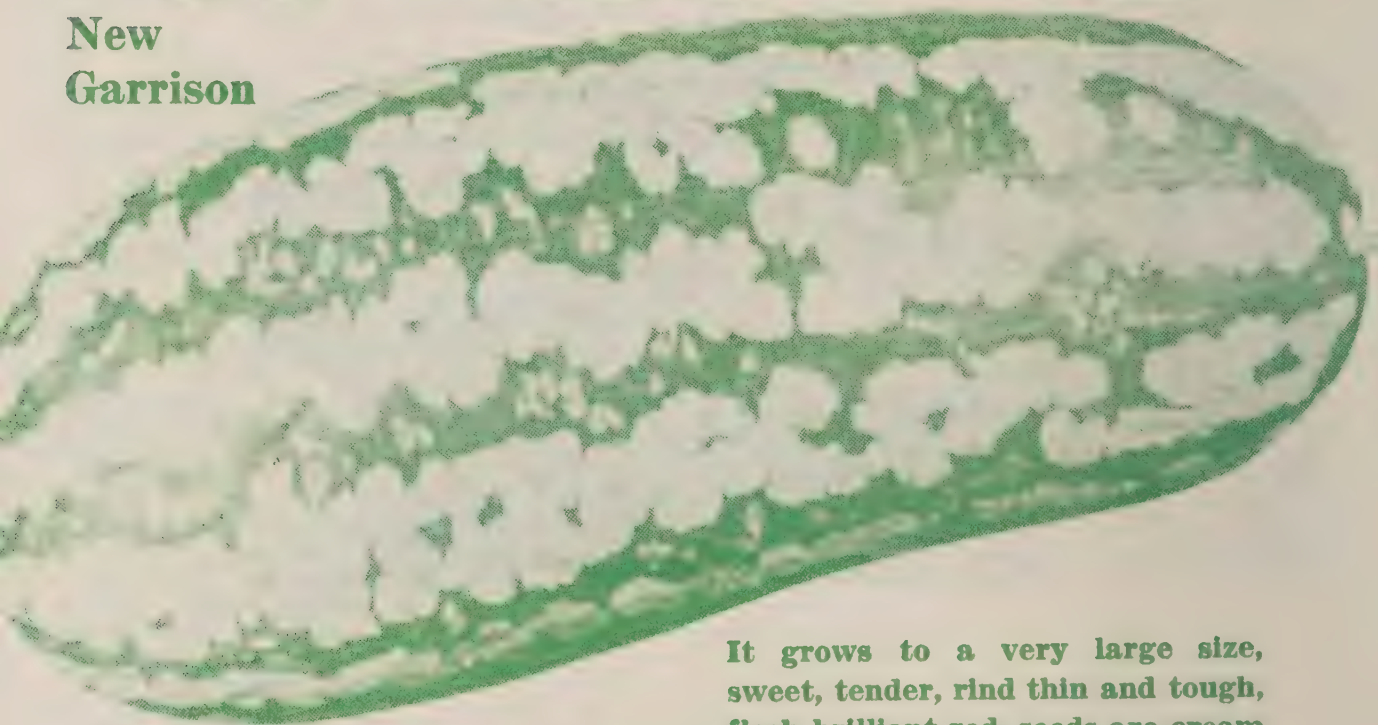

KLONDIKE—We are now offering three strains of this wonderful Melon which is fast becoming a favorite. The New Striped Klondike has the Reddest flesh of any Melon grown. This Melon resembles Dudes Creek or Ga. Rattle Snake in appearance. The Brown seed is a much Darker Melon with a Green Background, and heavy Dark Stripes. The Black SMALL SEED Klondike is a smaller Melon. Cuts deep red.

We offer you the following Varieties in the best Melon seed grown.

Tom Watson — Cletex — Alabama
Sweet — Sweet Heart — Black
Diamond — Dixie Queen — Kolbs Gem
Stone Mountain — Kleckly Sweet—
Halbert's Honey — Rattle Snake—Big
Boy — Rabault — Dudes Creek

Oz. 15c — ½ Lb. 70c — 1 Lb. \$1.25

New
Garrison

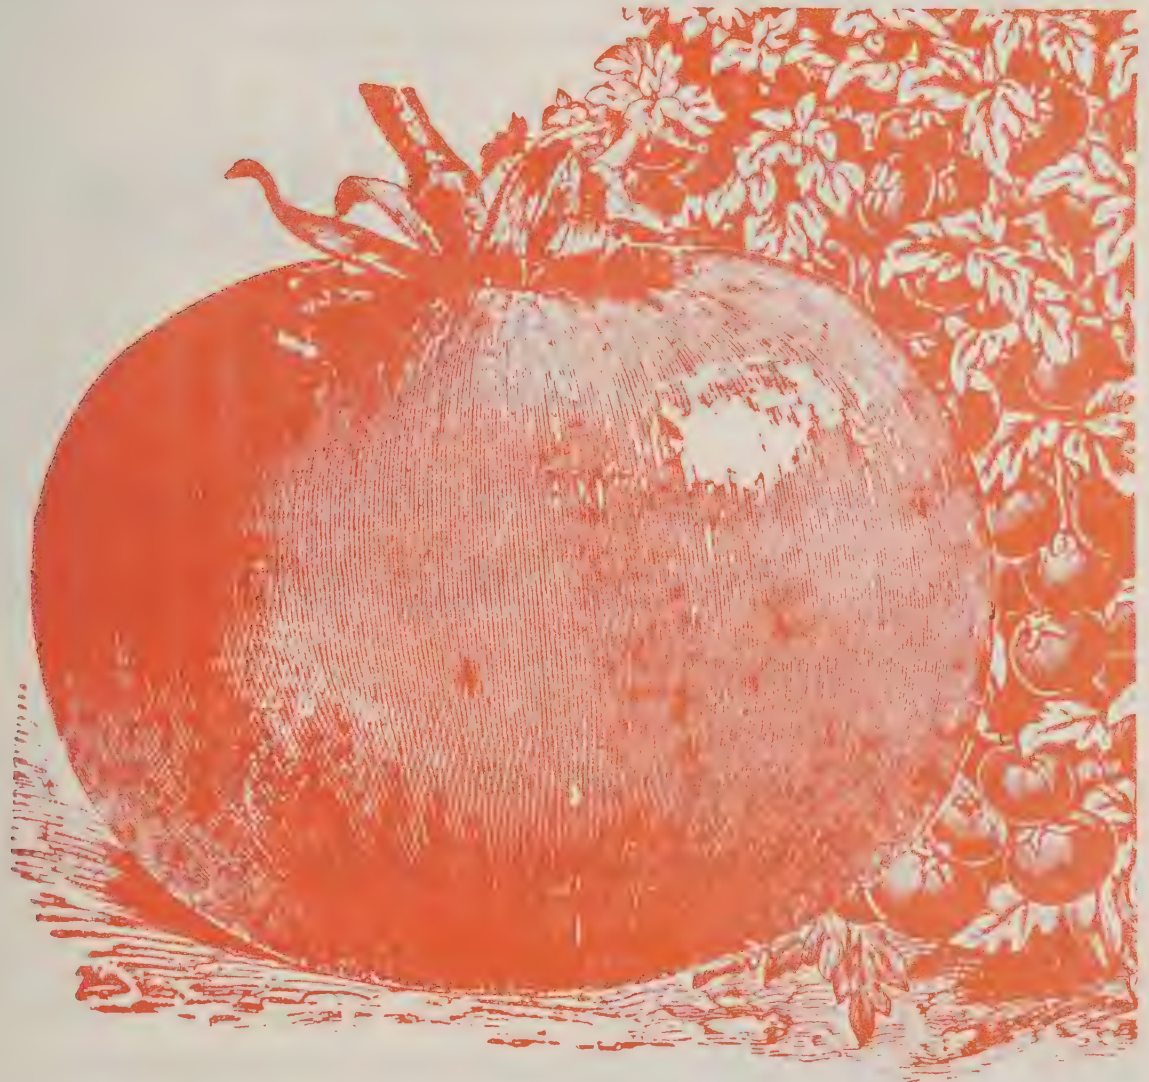

It grows to a very large size, sweet, tender, rind thin and tough, flesh brilliant red, seeds are cream and very few to melon, outside rind pea green, with darker mottled stripe.

KLONDIKE No. R7 (Wilt Resistant)—Weight 25 pounds. Edible in 90 days. This is the first strain of Klondike to be released showing a high resistance to wilt. It is otherwise very similar in all respects to the other types, except the seeds are mostly black intermingled with lighter shades.

TOMATOES

Our seed is grown in Delaware and New Jersey. The seed we offer you is grown with great care and as free from blight and rust as is possible to produce. You will be well pleased with results from our seeds. We can save you money on Tomato Seed. Write for our **SPECIAL PRICE.**

IMPROVED INDIAN SQUAW CORN (Blue & White)

Holds more records for wonderful performances under difficult conditions than any corn ever grown. It has an extremely early variety, maturing in 85 days. Perhaps the most wonderful quality of this corn is its power to resist drouth, and it does equally as well in wet seasons. Ears large, 10 to 12 inches and two on every stalk. The kernels are of different colors. Blue pins and red and white, giving the ears a curious beautiful mottled appearance. Order early. \$4.50 Per Bu.
